

浙江省 2020 年选拔优秀高职高专毕业生进入本科学习统一考试

英语

中升提醒：请考生按规定用笔将所有试题的答案涂写在答题纸上。

选择题部分

注意事项：

1. 答题前，考生务必将自己的姓名、准考证号用黑色字迹的签字笔或钢笔填写在答题纸规定的位置上。
2. 每小题选出答案后，用 2B 铅笔把答题纸上对应题目的答案标号涂黑。如需改动，用橡皮擦干净后，再选涂其他答案标号。不能答在试题卷上。

Part I Reading Comprehension (60 marks, 60 minutes)

Section A Passage Reading (每小题 2 分，共 50 分)

Format I

Directions: There are 4 passages in this part. Each passage is followed by some questions or unfinished statements. For each of them there are 4 choices marked A, B, C, and D. You should decide on the best choice and mark the corresponding letter on **The Answer Sheet**. (40 marks)

Passage One

Questions 1 to 5 are based on the following passage:

Three billion people, around 40% of the world's population, use online social media – and we're spending an average of two hours every day sharing, liking, tweeting (发推文) and updating on these platforms, according to some reports. That breaks down to around half a million tweets and Snapchat photos shared every minute. With social media playing such a big part in our lives, could we be sacrificing our mental health and well-being as well as our time? Since social media is relatively new to us, conclusive findings are limited. Actually, this is a fast-growing area of research, and clues are beginning to appear. Here are some of the findings:

MOOD

A good or bad mood may also spread between people on social media, according to researchers from the University of California.

ANXIETY

Researchers have looked at general anxiety provoked by social media, characterised by feelings

of restlessness and worry, and trouble sleeping and concentrating. A study published in the journal *Computers and Human Behaviour* found that people who report using seven or more social media platforms were more than three times as likely as people using less than two platforms to have high levels of anxiety. However, it's unclear how social media causes anxiety.

SLEEP

Humans used to spend their evenings in darkness, but now we're surrounded by artificial lighting all day and night. Research has found that **this** can reduce the body's production of the hormone melatonin (褪黑激素), which helps sleep.

ADDICTION

A few researchers point out that social media addiction may be harder to resist than cigarettes and alcohol.

It's clear that in many areas, not enough is known yet to draw many strong conclusions. However, the evidence does point one way: social media affects people differently, depending on pre-existing conditions and personality traits.

1. How many hours do people spend online on average?

A. Two.	C. Four.
B. Three.	D. Five.
2. What does the study in *Computers and Human Behavior* find about people using more social media?

A. They suffer more from anxiety.	C. They suffer less from troubled sleep.
B. They become more absent-minded.	D. They become more friendly to others.
3. The underlined word "this" in Paragraph Four probably refers to _____.

A. daylight	C. melatonin
B. artificial lighting	D. social media
4. Social media affects people differently, depending on _____.

A. understanding of social media	C. the time spent on social media
B. the social media platforms used	D. preconditions and characters
5. What is the theme of this passage?

A. Why people go online.
B. Who uses social platforms.
C. How many people go online every day.
D. How online activities affect mental health.

Passage Two

Questions 6 to 10 are based on the following passage:

Antibiotics (抗生素) are one of the miracles of modern medicine. They have saved countless lives. But there's another side to them. The bacteria (细菌) that live in our body, they've learned how to outwit many of our most powerful antibiotics. These drug resistant bacteria are called superbugs.

Here's how a bug becomes a superbug. When you take in antibiotic, there could be some bacteria that know how to resist that antibiotic. Those smart bacteria are the ones that survived your round of antibiotics and they **flourish**. And that's when you get a sharp increase of superbugs. And the more that we take antibiotics, the more chances the bacteria have to become resistant to them.

So, in the words of the latest CDC (Center for Disease Control) report, some miracle drugs no longer perform miracles, but it did come with some good news. The report says the number of deaths and infections caused by germs that resist antibiotics is decreasing. It dropped 18 percent between 2013 and now. And the number of infections caught in hospitals is down.

The bad news, according to the CDC, is that there are still too many germs that resist antibiotics, and that they can be caught anywhere in the community. The report says the answer isn't in developing more powerful antibiotics, but in using them less often. The CDC estimates that as many as one-third of the antibiotic prescriptions given in emergency rooms and doctor's offices aren't needed, but it doesn't entirely blame doctors for this, because it can be hard for them to tell when someone has a bacterial infection, which antibiotics could be good.

6. According to the passage, what have saved many lives?

- | | |
|----------------|-----------------|
| A. Operations. | C. Antibiotics. |
| B. Miracles. | D. Germs. |

7. The underlined word "flourish" in Paragraph Two probably means ____.

- | | |
|---------------------|-----------------|
| A. develop quickly | C. die suddenly |
| B. decrease sharply | D. run slowly |

8. The number of deaths and infections caused by germs that resist antibiotics dropped ____.

- | | |
|--------------|---------------|
| A. one third | C. 18 percent |
| B. one half | D. 81 percent |

9. According to the CDC report, how should we deal with the antibiotics-resistant germs?

- A. Giving better prescriptions.
B. Using antibiotics less often.

C. Catching germs in the community.

D. Developing more powerful antibiotics.

10. What is the main idea of this passage?

- A. We should use as many antibiotics as possible.
B. Antibiotics are effective despite drug-resistant germs.
C. Antibiotics are the greatest invention in human history.
D. Antibiotics have more positive aspects than negative effects.

Passage Three

Questions 11 to 15 are based on the following passage:

New research suggests that planting trees and other plants near factories could reduce pollution by almost one-third. The addition of plant life may even cost less and be more effective than technology designed to cut pollution, a new study found. The findings were reported in the publication *Environmental Science & Technology*. The lead author of the study was Bhavik Bakshi, a professor at the Ohio State University.

Bakshi and other researchers collected data about air pollution and plant life in 48 of the 50 American states. They studied public records from every state other than Alaska and Hawaii. The study attempted to show how the vegetation (植被) could reduce the most common pollutants (污染物) from industrial areas, including the production of energy from coal, oil and gas.

The researchers found that restoring vegetation to land cover could cut air pollutant levels an average of 27 percent in the areas studied. They also found that in 75 percent of the areas, it would cost less to use plants and trees to reduce air pollution than to add new air cleaning technology.

Bakshi said that nature-based methods could result in "win-win" solutions that save money and are better for the environment. It found that only one piece of equipment was estimated to be more cost-effective than trees and plants. That device is an industrial boiler.

The study did not identify which kinds of trees or plants would be best at reducing air pollution. But Bakshi said the kind of vegetation likely would **make a difference** in air quality and that further study is needed.

The researchers predicted that the addition of trees and plants could help lower air pollution levels in both cities and rural areas. However, success rates would differ widely depending on how much land is available and current air quality levels.

11. How did the researchers conduct the research?

- A. They gave up the out-dated public records.
- B. They gathered information on pollution and plants.
- C. They did experiments in the Ohio State University.
- D. They studied data on technology in science journals.

12. _____ could cut air pollutant levels.

- A. Expanding rural areas
- B. Developing Alaska and Hawaii
- C. Producing more coal, oil and gas
- D. Bringing back vegetation to land cover

13. What is more cost-effective than trees and plants?

- A. New energy.
- B. An industrial boiler.
- C. The nature-based method.
- D. New cleaning technology.

14. The underlined phrase “make a difference” in Paragraph Five probably means _____.

- A. be effective
- B. be productive
- C. take place
- D. stand out

15. What does the passage mainly tell us?

- A. New technology can benefit the environment.
- B. Air pollution has worsened in the United States.
- C. Adding plant life cuts pollution and reduces cost.
- D. Different trees contribute differently to the environment.

Passage Four

Questions 16 to 20 are based on the following passage:

Social scientists believe that names influence personality, how we're perceived (认知), and even our physical appearances. In turn, our appearances impact how other people perceive us, which again affects how we feel and see ourselves. Psychologists believe there's a relationship between internals and externals that shapes us.

Recently, researchers from Hebrew University in Jerusalem decided to test whether stereotypes (刻板印象) and labels have an effect on physical appearance. That is to say, they wanted to find out if the name a person is given at birth influences later physicality.

The study **hypothesized** that this early label marks all those who bear the same name similarly, so much so that other people can match name to face based on expectations of how someone with a

certain name is likely to look. In other words, name stereotypes show physically in facial appearance. The research team found that both people and computers could pick the right name for a given face with more accuracy than would result from chance. That means common ideas of how a person with a certain name would look were correct—there was a “right” name for a type of face.

Face-name matching likely works on many levels, the study suggests. Because we have shared ideas of what names mean, people with those names may “grow into” them by adapting expected behavior, facial expressions, and looks, and others will also have certain expectations. Say your name is Rose. Social expectations may direct you to act womanly, smile gently, wear dresses, and grow your hair long. This is perhaps unconsciously expected more of a woman named for a flower than one who goes by Alex, a name that in the US is common for males and females. Alex may feel freer to bend gender stereotypes than Rose.

16. Part of the job of a psychologist might be to study _____.

- A. how to improve people's behavior
- B. how to change people's appearances
- C. the relationship between mind and behavior
- D. the relationship between knowledge and looks

17. The underlined word “hypothesized” in Paragraph Three probably means _____.

- A. supposed
- B. displayed
- C. doubted
- D. opposed

18. What does the example about the names of Rose and Alex indicate?

- A. Men and women are affected differently by their name.
- B. A girl with a boy's name will not grow into a gentle woman.
- C. There is little relationship between one's name and behavior.
- D. Shared ideas of names may influence how we look and behave.

19. What is the author's attitude towards the study?

- A. Pleased.
- B. Unbelieving.
- C. Surprised.
- D. Objective.

20. What is the main idea of the passage?

- A. A good name may bring good luck.
- B. Your name might influence your appearance.

- C. People name babies according to their appearances.
- D. Some names are more proper for women than others.

Format II

Directions: In the following passage, some sentences have been removed. For questions 21 to 25, choose the most suitable sentence from choices A—G to fit into each of the numbered blanks.

There are two extra choices, which do not fit into any of the blanks. You should decide on the best choice and blacken the corresponding letter on **The Answer Sheet**. (10 marks)

Do you often feel tired in the morning even though you’ve been in bed for seven or eight hours the night before? Like many people, you are not sleeping as much as you think you are. 21. _____ There is no specific number for efficiency that’s been proven as linked to poor health. However, according to a *New York Times* report about sleep quality, some experts estimate a rough number of 85 percent or above as a decent place to be:

22. _____

Avoid blue light at night. Short wavelength blue light, sent out by the sun and by the screens of computers, iPads and smart-phones, makes you feel more alert. Blue light tells your brain it’s daytime. 23. _____ You can also try installing apps that can filter (过滤) blue light on your devices.

24. _____ Go to bed and wake up at relatively the same time. Consistency (连贯性) is key to a good night’s sleep, especially when it comes to waking up. When you have a regular wake-up time, your brain gets used to this and moves through the sleep cycle in preparation for you to feel rested and alert at your wake-up time. Roughly an hour before you wake, hormone levels increase gradually, causing you to become more alert.

Take naps. One of the biggest peaks in melatonin production happens during the 1 to 3 pm time frame. 25. _____ If you aren’t getting enough sleep at night, you’re likely to feel an overwhelming desire to sleep in the afternoon. When this happens, you’re better off taking a short nap than resorting to caffeine or strong tea to keep you awake. A short nap will give you the rest you need to get through the rest of the afternoon, and you’ll sleep much better in the evening than if you take a long afternoon nap.

- A. Keep a consistent sleep schedule.
- B. “Sleep efficiency” is the percentage of time you actually sleep.
- C. In other words, you feel most sleepy in the morning.

- D. It explains why most people feel sleepy in the afternoon.
- E. People find that it is difficult to sleep well.
- F. Here are some tips for improving sleep efficiency.
- G. Turn off your computers and phones before bed.

Section B Blanked Cloze (每小题 1 分, 共 10 分)

Directions: In this section, there is a passage with 10 blanks. You are required to select one word for each blank from a list of choices given in a word bank following the passage. Read the passage through carefully before making your choices. Please blacken the corresponding letter for each item on **The Answer Sheet**. You may not use any of the words in the bank more than once. (10 marks)

Scientists, who found the world’s oceans were warming faster than they previously believed, have said their study had errors. The study, published in *Nature*, found that “26 warming is at the high end of previous estimates”. The researchers used precise measurements between 1991 and 2016 to estimate ocean 27 uptake (吸收) over that period.

Since the 28 of the study, two problems had come to their attention, one of them related to 29 treating systematic errors in the measurements of oxygen.

“We expect these two corrections will have little 30 on our calculations of overall heat uptake, but with larger margins (幅度) of error,” said a researcher. “We are redoing the calculations and 31 corrections for *Nature*.”

Nature said it was looking into the 32. “Making sure the accuracy of the scientific record is important to us as publishers and we recognize our 33 to correct errors in papers that we have published,” a spokesperson said.

The research was published weeks after a report from the United Nations 34 that humanity has just over 10 years to act to avoid disastrous levels of global warming, urging governments to make “35 and far-reaching changes in all aspects of society”.

- | | | |
|-------------------|----------------|----------------|
| A. choice | F. earth | K. preparing |
| B. heat | G. matter | L. popular |
| C. responsibility | H. publication | M. incorrectly |
| D. carefully | I. warned | N. hoped |
| E. effect | J. ocean | O. rapid |

Part II Integrated Testing (30 marks, 30minutes)

Section A Cloze (每小题 1 分, 共 20 分)

Directions: There are 20 blanks in the following passage. For each blank there are 4 choices marked A, B, C and D. You should choose the ONE that best fits into the passage. Then blacken corresponding letter on **The Answer Sheet**. (20 marks)

Probably the most famous apple in history belonged to Isaac Newton. His apple became the 36 for a great scientist discovery: the force of gravity (重力). 37, some historians question if the apple even existed. When examining history, people try to 38 the fact from the fiction. And in Newton's 39, his scientific work was the fact, and the story about the apple was all 40.

41 a young man, Newton left home to study science at Cambridge University. One day while he was 42 under an apple tree, an apple fell from a branch above and hit him 43 on the head. He looked at the apple and 44 to think why the apple fell, 45 some of the scientific knowledge from school. Newton realized that 46 inside Earth were always pulling objects toward its center. That's why the apple fell down and did not stay 47 high up in the tree. When a person jumps, he or she does not rise quickly 48 space like a lost balloon. Gravity 49 everything toward the ground.

What's the problem with this famous and 50 apple story? Most historians don't believe it 51 happened. Then why did he tell this 52? Today the general belief is that Newton 53 that apple to make theory more memorable. Now some people don't even remember 54 the apple fell on Newton's head. Not everyone remembers the work Newton did to 55 the world. Much of the time, people remember the apple more than him.

- | | | | |
|-------------------|------------|-------------|------------------|
| 36. A. result | B. symbol | C. theory | D. object |
| 37. A. In a word | B. Besides | C. However | D. For one thing |
| 38. A. separate | B. believe | C. show | D. prevent |
| 39. A. honor | B. way | C. case | D. role |
| 40. A. experiment | B. crime | C. science | D. fiction |
| 41. A. As | B. For | C. Like | D. Along |
| 42. A. marching | B. resting | C. arriving | D. mining |
| 43. A. purposely | B. fast | C. angrily | D. right |
| 44. A. brought | B. began | C. stuck | D. grew |

- | | | | |
|-------------------|-----------------|---------------|--------------|
| 45. A. replying | B. gaining | C. applying | D. proving |
| 46. A. rocks | B. forces | C. shells | D. materials |
| 47. A. standing | B. disappearing | C. connecting | D. floating |
| 48. A. into | B. over | C. out of | D. down |
| 49. A. locates | B. gathers | C. pulls | D. destroys |
| 50. A. comforting | B. upsetting | C. shocking | D. inspiring |
| 51. A. ever | B. forever | C. never | D. however |
| 52. A. statement | B. truth | C. story | D. news |
| 53. A. discovered | B. argued | C. spread | D. invented |
| 54. A. what | B. why | C. who | D. which |
| 55. A. change | B. repair | C. protect | D. lift |

Section B Short Answer Questions (每小题 2 分, 共 10 分)

Directions: In this part there is a short passage followed by five questions or incomplete statements. Read the passage carefully. Then answer the questions or complete the statements with no more than 10 words. Please write your answers on **The Answer Sheet**. (10 marks)

A friend told me an experience she had in the hospital. As she lay terrified on the wheeling bed being rolled towards the operation room, a male orderly (勤杂工) appeared by her side and quietly took her hand. He walked beside her all the way. Her terror became less intense. When they reached the operating room, he gently put her hand down and she was rolled in. She was still terrified, but the feeling of being cared for filled more of her mind than her fear.

When she awoke in her room, the surgery successful, all she remembered was that hand in hers and the safe and cared-for way she felt at that time.

"I don't remember the color of his skin or anything about him," my friend said gently, "but I'll always remember the act of compassion."

My friend will remember that act long after she has forgotten most of the events in her life. This small act of comfort shows the orderly's ability to open his heart to others. The orderly in my friend's life opened himself to her and she will never forget him.

You do not need to hug everyone you meet, but your heart can be open. You do not need to talk to every stranger, but your heart can be open. Openness to others as you would like to be open to is love. Can you live with an open heart, even while others are frightened? Love is not taking advantage of the weaknesses of others. It is making the needs of others as important as your own.

Love is like a fire that is out of control. Once lit, it cannot be contained. You may strive for moderation (适度; 节制) in diet, exercise, and work, but striving for moderation in love is like striving for moderation in breathing.

Practice moderation in all things except love.

56. How did my friend feel as she lay on the wheeling bed?

57. How did she feel after the orderly took her hand?

58. What did the orderly's small act of comfort show about him?

59. Love is not taking advantage of the weaknesses of others, but making _____.

60. The last paragraph asks us to _____.

Part III Translation (30 marks, 30 minutes)

Section A Chinese-English Translation (每小题 3 分, 共 15 分)

Directions: Complete the sentences by translating into English the Chinese given in the brackets.

Please write your translation on **The Answer Sheet**. (15 marks)

61. She is well known for _____ (救了四十多人的性命) in an earthquake.

62. It is critical _____ (保持公园开放) for the benefits of citizens as well as the development of the city.

63. The reason why _____ (他从公司辞职) is that he wants to become a teacher in the west of China.

64. I wish _____ (我学的是历史而不是地理) when I was in university.

65. Nowhere else in the company _____ (你能找到比他工作勤奋的人).

Section B English-Chinese Translation (每小题 3 分, 共 15 分)

Directions: Translate into English the underlined sentences in the following passage. Please

write your translation on **The Answer Sheet**. (15 marks)

Masks (面具; 面罩) Have Helped People Face Fears Before

"It is a book, about face, a book about life and death," fiction writer Zhang Chi said when talking about his newly-published work, *Ancient People's Expression*. 66. It is a book about masks, not the masks to prevent us from diseases, but the masks made by ancient people. The masks reflected their understanding about the universe, about heaven, and about everything they had difficulty with their daily lives.

Ancient masks, which were made largely of stones, jade (玉石), bones, shell or metal, were

meant to meet people's psychological needs. 67. Masks made of wood or leather have mostly been damaged. While these masks seem to have nothing to do with the face masks people wear today, fear and the need for protection is a common reason.

68. Ancient people made masks largely because of fear. A lack of understanding about nature and a lack of defense against natural disasters or beasts resulted in a fear for their lives. The masks made of stone could be a psychological protection against any disaster they may face.

Masks used as burial objects often look ugly, even frightening. Most of the masks made of jade were used as burial objects, which shows ancient people believed there was another place for those who had left this world. 69. They wished masks buried with their bodies could keep them safe.

With increasing knowledge about nature and man's stronger ability to deal with natural disasters, 70. the role that masks played in ancient people's lives became less important.

Zhang says it was not easy to understand what ancient people were trying to express, but "one needs to look into the eyes of these masks, there may be an instant when one has got an idea about the fear and worries, of our ancient ancestors."

66. It is a book about masks, not the masks to prevent us from diseases, but the masks made by ancient people.

67. Masks made of wood or leather have mostly been damaged.

68. Ancient people made masks largely because of fear.

69. They wished masks buried with their bodies could keep them safe.

70. the role that masks played in ancient people's lives became less important.

Part IV Writing (30 marks, 30 minutes)

Directions: For this part, you are allowed 30 minutes to write a composition on the topic **My**

Favorite Application. You should write about 120 words following the outline given below.

Please write your composition on **The Answer Sheet**. (30 marks)

71. (1) 介绍一种你最喜爱的中国传统艺术形式(戏曲、诗词、书画……);

(2) 陈述你的理由。
